

## Data Science Intern

---

### Company Overview:

The Bee Corp is a benefit corporation founded in Bloomington, IN that applies data analytics to beekeeping. Our mission is to empower growers and beekeepers by delivering insights into beehive health. The Bee Corp pursues this mission by offering growers infrared inspection technology to measure pollination value and drive decisions to protect yield.

### Position Summary:

The Bee Corp is looking for a Data Science intern to analyze hive data and build algorithms in our infrared image analysis platform. Statistical and mathematical techniques will be used to create models of hive health. Beekeeping knowledge is not required. Candidate should be self-motivated, and able to communicate complex ideas with other employees and work in a team environment. This is a paid role.

### Position Responsibilities:

- Analyze hive data to find insights on colony size
- Build scripts to automate data analysis
- Work with a large database, including image and thermal data

### Qualifications:

- Bachelor or Master's degree in Statistics, Applied Math, Data Science, or a related field
- Experience working with Python required
- Experience with visualization tools like Tableau or PowerBI is a plus
- Familiarity with machine learning techniques and algorithm analysis
- Able to work 10-20 hours/week

### Inclusion and Equal Opportunity Employment

The Bee Corp is an equal opportunity employer committed to diversity and inclusion. We are pleased to consider all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, protected veterans status, Aboriginal/Native American status or any other legally-protected factors. Disability-related accommodations during the application process are available upon request.
