

## Full Stack Developer

---

### Company Overview:

The Bee Corp is a benefit corporation founded in Bloomington, IN that applies data analytics to beekeeping. Our mission is to empower growers and beekeepers by delivering insights into beehive health. The Bee Corp pursues this mission by offering growers infrared inspection technology to measure pollination value and drive decisions to protect yield.

### Position Summary:

The Bee Corp is looking for a Full Stack Developer to automate existing back end software pipelines, build a hybrid web app, and integrate back end and front-end software. This role will work closely with the Data Science team to build, test, and improve software. Beekeeping and infrared knowledge are not required. Candidate should be self-motivated, able to work independently and on teams, and communicate complex ideas with other employees and work in a team environment. This job will be in Indianapolis, IN.

### Position Responsibilities:

- Automate existing back-end software
- Build hybrid web app
- Integrate back and front-end software

### Qualifications:

- Bachelor **or** master's degree in Computer Science or a related field
  - **Or** graduation from coding academy with at least a bachelor's attained in any field
- Experience working with Python and JavaScript required
- Experience with other languages and frameworks are a plus

### Inclusion and Equal Opportunity Employment

The Bee Corp is an equal opportunity employer committed to diversity and inclusion. We are pleased to consider all qualified applicants for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, protected veterans status, Aboriginal/Native American status or any other legally-protected factors. Disability-related accommodations during the application process are available upon request.
